

## Aviation Performance Solutions (APS) Jet Upset Training App

This powerful tool for the jet pilot based on the content of the Airplane Upset Recovery Training Aid (AURTA) facilitates learning with an easy-to-use format for a variety of mobile platforms (iPad, iPhone, MS Surface and Windows 8 Metro Apps). The app integrates real-world mishap analyses, covers upset awareness and recognition, and outlines prevention and recovery techniques and strategies. Concepts are reinforced by selectable on-page narration with animations and graphics, including 15 instructional videos.

### ***A Learning Tool Aligned with Global Best-Practice Standards***

Since the introduction of the Airplane Upset Recovery Training Aid (AURTA) in 1998, Loss of Control In-Flight (LOC-I) has continued to impact the aviation community. From reported accident and incident information, APS continues

AVIATION  
PERFORMANCE  
SOLUTIONS

to learn the causes of LOC-I and how to prevent these types of accidents. This training app begins with AURTA as its basis then enhances that foundational knowledge with real-world data. Industry guidance has been organized into an efficient, modular e-learning structure that integrates enhanced learning tools to include updated charts, video training and animations of more complex concepts.

### ***Learn on Your Terms***

Take your training with you; learn on your timetable; start, stop and return right to where you left off with ease.

- Easy navigation from the always-accessible homepage.
- Offline mode enables use even when your device is not connected to the web.
- Progress bars indicate how far you've progressed through each module.
- Module-by-module test questions with exam status and scores displayed on the homepage.
- Printable certificate of completion is provided.

### ***Obtaining your download***

The Jet Upset Training App is available in the Performance Vector Individual Courses option. Policyholders that select this option customize a package of up to 5-individual e-learning courses from a roster of available programs. After the Jet Upset Training App is requested in your Performance Vector enrollment, USAIG will place your order with APS. An email from APS containing download instructions will follow to each of your assigned trainees. Enroll in USAIG Performance Vector by contacting your broker, underwriter, or contacting USAIG's Aviation Safety Programs Director at (212) 859-3856 / by email at [safety@usaig.com](mailto:safety@usaig.com).

### ***About APS***

Aviation Performance Solutions LLC (APS), headquartered at the Phoenix-Mesa Gateway Airport in Mesa, Arizona, trains thousands of professional pilots and instructors in comprehensive upset prevention and recovery training skill development. APS provides integrated LOC-I solutions via industry-leading tablet-based, on-aircraft (jet and piston), and full-flight simulator upset prevention & recovery training (UPRT) and is the only Part 141 Flight School certified in the delivery of complete upset prevention & recovery, stall/spin and instrument upset recovery training courses worldwide. With additional training locations in Dallas (USA), The Netherlands (Europe) and the Saudi Arabia (Middle East), APS provides global access to the highest quality upset prevention and recovery training available.
