

Hope Aviation Presented Eagle Aviation with a Performance Vector Achievement Plaque

December 2015

Hope Aviation, on behalf of USAIG, a leading provider of insurance to the aviation and aerospace industries, presented their insured, Eagle Aviation with a Performance Vector achievement plaque. The plaque acknowledges their completion of the Safety 1st Professional Line Service training.

Performance Vector is available to any USAIG-insured operator of turbine-powered aircraft regardless of fleet size. Programs that satisfy multiple industry and regulatory requirements for human factors training and safety management systems have been selected to not only boost organizational performance, but also facilitate satisfaction of NBAA, IS-BAO and other leading safety management criteria. Operators can choose from a lineup of programs that best supplement their ongoing safety initiatives. When USAIG policyholders utilize Performance Vector services, an achievement plaque is provided to the operator. Each time they complete additional training or enroll in new safety services, USAIG sends the appropriate placard to add to the plaque's display.
