PRISM SMS and USAIG
Performance Vector Safety Program

PRISM and USAIG have partnered to provide your operation with access to the industry's most cutting-edge Safety Management System. USAIG policyholders that are eligible to participate in Performance Vector may select a PRISM SMS subscription at no charge for the first annual subscription period and receive discounts when renewing their subscription in subsequent years.

PRISM Essential Subscription:

Your operation will have access to PRISM's SMS experts and will receive a steady stream of materials to guide your dynamic SMS and internal evaluation programs. If you select PRISM Essential through the Performance Vector program USAIG will cover your full subscription cost.

PRISM Professional Subscription:

Builds on the PRISM Essential service, adding customizable, web-enabled tools for flight and ground risk assessment, hazard & incident reporting, detailed risk assessment with a customizable risk matrix tool, SMS administration, and much more (see chart on next page). If PRISM Professional is selected through the USAIG Performance Vector program, a new subscriber will pay nothing for the first year. Returning PRISM Pro subscribers can obtain a substantial cost saving on subscription renewals.

PRISM: Complete and Simple SMS Support

PRISM's unique internet-enabled solutions coupled with in-house Safety Experts address the challenges of setting up a functional and effective SMS.

PRISM SMS is designed around a three-pronged approach to safety management.

1. PRISM delivers a steady, ongoing stream of materials to sustain your flight operation's safety management efforts.

2. PRISM provides a continuously improving set of information management tools that evolve with industry practices to keep you on the cutting edge.

3. Personal support is the cornerstone of our program. The relationship with our customers is embraced as an ongoing partnership and is the most important component of our program.

PRISM's Online Solution: ARMOR

PRISM understands the 24/7 nature of the aviation industry and has developed ARMOR (Aviation Risk Management Online Resource), a web-based suite of tools that provides operators with a system that all employees can access at any time, while allowing the safety officer the ability to manage all SMS elements with a laptop and internet connection from anywhere around the world. See chart on next page for list of tools

The PRISM iOS (iPad/iPhone) app offers mobile (online and offline) submission capability. Operators can access their customizable templates to submit FRAT, GRAT, Hazard & Incident Reports.

PRISM SMS Solutions

PRISM is designed to comprehensively manage the risks your organization and employees face. Using our unique partnership approach coupled with powerful safety management tools and documentation, PRISM delivers a complete SMS solution so you can focus on what's important – operating safely.
