

eLearning Safety Management Systems (SMS) for Managers

FlightSafety International and the International Business Aviation Council (IBAC) have co-developed this Safety Management Systems (SMS) course designed for flight department managers and those tasked with developing an SMS.

Put yourself in the seat of a safety manager learning how to build an SMS from the ground up with this all-new, scenario-based course. Throughout the course, you will learn how to successfully develop and manage a safety management system within your organization. This course will also prepare you to effectively identify and control safety-risks by implementing industry-standard best practices.

By the end of this course, learners will be able to:

- Describe the four components of an SMS
- Explain the risk management process
- Describe the process for evaluating safety risk controls and managing change
- Summarize the SMS implementation process
- List SMS best practices
