

DO NOT DISTURB

AIRWORTHINESS DEPENDS ON
WHAT'S DONE HERE

Maintenance technicians are the backbone of every safe and successful flight operation. Make sure their environment and protocols support the complex, exacting, and high-consequence work they do. Keep the hangar a place of serious purpose and limited distractions, where no aircraft is declared airworthy until it actually is.

- ▶ Keep the maintenance area ordered, clean, and as distraction-free as possible.
- ▶ Always use proper tools, parts, and consumables—this is no place to improvise.
- ▶ Get help with maintenance questions or tasks that exceed your authority or knowledge limits.
- ▶ Review and directly validate the last two steps completed before resuming after a workflow interruption.
