

# BE THE STRONGEST LINK

SECURITY DEPENDS ON YOU

Crucial centers of business and movement, airports require everyone's vigilance to keep travelers safe and property secure. Security protocols and perimeters are only as strong as their weakest element. Play your role to help lessen risks when in controlled-access environments.

- ▶ Double-check to ensure unattended access points are secure. Leaving one open once is a risky mistake; doing it habitually creates a huge vulnerability.
- ▶ Respectfully engage unrecognized people in controlled areas to verify credentials.
- ▶ Ask yourself if something is out of place. Then, 1) what is it, 2) who else needs to know, and 3) have you told them?
- ▶ Lock and fully secure aircraft when unattended.
