

Preparing for IS-BAO or IS-BAH Audit Performance Vector Safety Program

The globally recognized and voluntary International Standards for Business Aircraft Operators (IS-BAO™) and Business Aircraft Handling (IS-BAH™) are administered by the International Business Aviation Council (IBAC). These standards promote a proactive risk management framework that enhances a company's culture of continuous improvement and incorporates safety as a core value. Implementing them helps operators and ground handlers apply industry best practices by challenging them to review and compare their safety-related policies, processes and procedures, and then make improvements. USAIG recognizes that preparing for and undergoing an IS-BAO or IS-BAH audit fosters a systematic organizational approach to safety and we encourage the pursuit and attainment of these registrations. This Performance Vector option addresses the first two steps toward registration:

First: USAIG will purchase initial access to the IS-BAO or IS-BAH standard for your organization (a requirement for registration). For IS-BAO purchases, IBAC provides a download code to access the current materials for one year. For organizations that attain and maintain registration at any IS-BAO Stage level, access to updated documents is renewed annually at no charge. IBAC charges a \$300 fee for unregistered organizations to renew annual access to the IS-BAO standard, which is not part of this offer. For organizations pursuing IS-BAH registration, USAIG will cover the first 2-years of the IS-BAH subscription that includes access to the IS-BAH standard, a Fundamentals workshop, and registration fee.

Second: USAIG will purchase one attendee's tuition for an IS-BAO Initial virtual workshop. For policyholders that have already purchased organizational access to the applicable standard, USAIG can cover one additional attendee's tuition for an IS-BAO Initial or Recurrent workshop, or two attendees' tuition for an IS-BAH Fundamentals workshop as part of this offer.

Policyholders preparing for IS-BAO or IS-BAH registration are encouraged to review [IBAC's online program descriptions](#) and [virtual workshop schedules](#) thoroughly to gain familiarity with the process and steps required. Those wishing to use this offer **should not** self-purchase access to the standard or workshop attendance, but rather contact their aviation insurance broker, underwriter, or USAIG Safety Programs at safety@usaig.com to first enroll in Performance Vector. Performance Vector benefits associated with this offer must be applied directly with IBAC and cannot reimburse your organization for services self-ordered independently.

This Performance Vector option benefits organizations preparing for initial registration or renewal audits.
